

K12 Virtual School Programs

A complete distance education solution that meets state academic standards

K12 Inc. provides a comprehensive virtual solution for districts and schools wanting to serve students through distance- or home-based learning programs. As K12 Virtual School Program participants, schools and districts operating their own virtual schools or homeschool assistance programs can offer the K12 curriculum to enrolled students.

Based on traditional content and proven teaching methods, K12 supplies all the materials, lessons, and tools parents need to help their children learn at home while meeting state academic standards. Schools partner with families by providing a certified teacher to monitor student progress, attendance, work samples and to provide instruction, suggestions and support.

Curriculum – K12’s comprehensive curriculum is based on proven learning methods, the latest research, and traditional academic content. The virtual is designed to meet or exceed state academic standards and Placement tests are available to help students start at the appropriate level.

Materials – K12 provides instructional materials including textbooks, workbooks, math manipulatives, hard-to-find supplies, science equipment, CDs and more, all shipped directly to enrolled families.

Parental Involvement – Parents and students work together for up to five hours each day. Some of this time is spent in direct instruction, and some is spent in independent reading or other study activities. The curriculum includes tools to help parents keep track of instruction time so the school district gets credit.

Technology – The K12 curriculum is accessed through an innovative Online School (OLS). Students in grades K–5 do about 15–30 percent of the work online. As students get older and more self-directed, instruction and activities involve increased computer use, according to education standards.

Elementary and Middle School Courses – K12 has programs for students from kindergarten through grade 9. Teachers and parents can choose the appropriate level for each student in each subject. With tools that allow students to work at their own pace, the K12 curriculum can be tailored for students’ individual needs and learning styles.

Adaptable Tools – K12 provides progress, attendance, and planning tools, as well as daily and weekly schedules that help teachers monitor students’ activities. These tools also help parents stay organized as they guide their student’s learning.

Language Arts/English

Builds competence and confidence in phonics, reading, writing, grammar, spelling, comprehension, and vocabulary.

Math

Helps students master mathematical operations and concepts through online activities, and provides constant reinforcement with skills updates.

Science

Encourages students to explore scientific concepts through investigation and experiments, and to learn to think carefully about what they do and see.

History

Opens students’ minds and imaginations to far-off lands, distant times, and diverse cultures through literature, geography, and civics.

Art

Combines fun projects with learning about classic art and artists to develop a lifelong interest in artistic expression and appreciation.

Music

Teaches fundamentals through the study of classical music, great composers, and traditional folk songs.

“I have been a homeschool parent for eleven years and an educator in public schools for five. The K12 program leaves no holes or gaps in the students’ education. I am thrilled that my school district is providing this opportunity for all children to have a well-balanced education. K12 has opened doors for parents, children, and school districts to help an entire community, not just those in public or private school.”

Laura Belnap
K12 Program Director
Davis School District
